

Drain Basin Configurator 2.0

www.basinconfigurator.com

ADS Drainage Structures from Nyloplast combine ductile iron grates with a rugged, heavy duty PVC structure. The product line, available from ADS, includes inline drains, drain basins, curb inlet structures, road and highway structures and drop-in grates which can be used for any underground storm drain pipe system.

The updated Basin Configurator design program automatically designs a Nyloplast drain structure quickly and easily online. Entering basic design or plan page information enables the proprietary software to customize a basin for any project. Input sections include type of pipe, basin diameter, and details for each branch including diameter, angle and invert height. Any miscalculations are avoided as the program automatically guides you to the correct measurement(s). The program then provides a shop drawing and downloadable product details that can be immediately ordered or saved in the user's private account.

Design Engineers

- Structure and Grate Specifications and details for 8" - 36" (200 - 900 mm) structures
- Download CAD files specific to your project
- Design structures with weirs, Envirohood™ & FlexStorm® Filters for water quality.
- Verify minimum angles required for water-tight structure connections

Distributors

- Ability to create custom Nyloplast Shop Drawings ready for fabrications
- Download PDF design details for submittals
- Enhanced dashboard features include ability to edit, download, submit, and store project for future references

Contractors

- Mobile access to create Nyloplast shop drawings from any phone or tablet
- Easy submission process to receive structure pricing/cost estimates
- Enhanced dashboard features including ability to edit, submit, and store projects

ADS Service: ADS representatives are committed to providing you with the answers to all your questions, including specifications, installation and more.
